

The Master thesis „Blahoslav Pípal as Verbi Divini Minister“ offers a theological profile of a preacher. It is divided into six chapters. The introduction presents the character of the study. The second chapter describes the preacher's itinerary – Pípal's activity in several congregations of the Evangelical Church of Czech Brethren (ČCE). The third chapter is devoted to the thematic analysis of his sermons (main themes are God, christology, Church, life, man). The first part of the fourth chapter features the form and the structure of Pípal's sermons. It shows how the preacher works with the biblical text and how he addresses the auditory. Two sermons are analysed in detail in the second part of the fourth chapter. The final chapter presents B. Pípal as an exegete and as a translator.
